SWASTIK
PAPER MACHINERY

ABOUT US:

Swastik Paper Cup Machinery, established in 1990, is a distinguished company that specializes in providing clients worldwide with high-quality paper cup machines and transient paper glass machines. Under the leadership of our esteemed CEO, Kartik Gupta, we have become an industry leader known for our commitment to excellence and customer satisfaction. With three decades of experience, we have refined our ability to produce dependable and effective machines**.** Our machines accommodate the diverse requirements of our clients, from small businesses to multinational corporations.

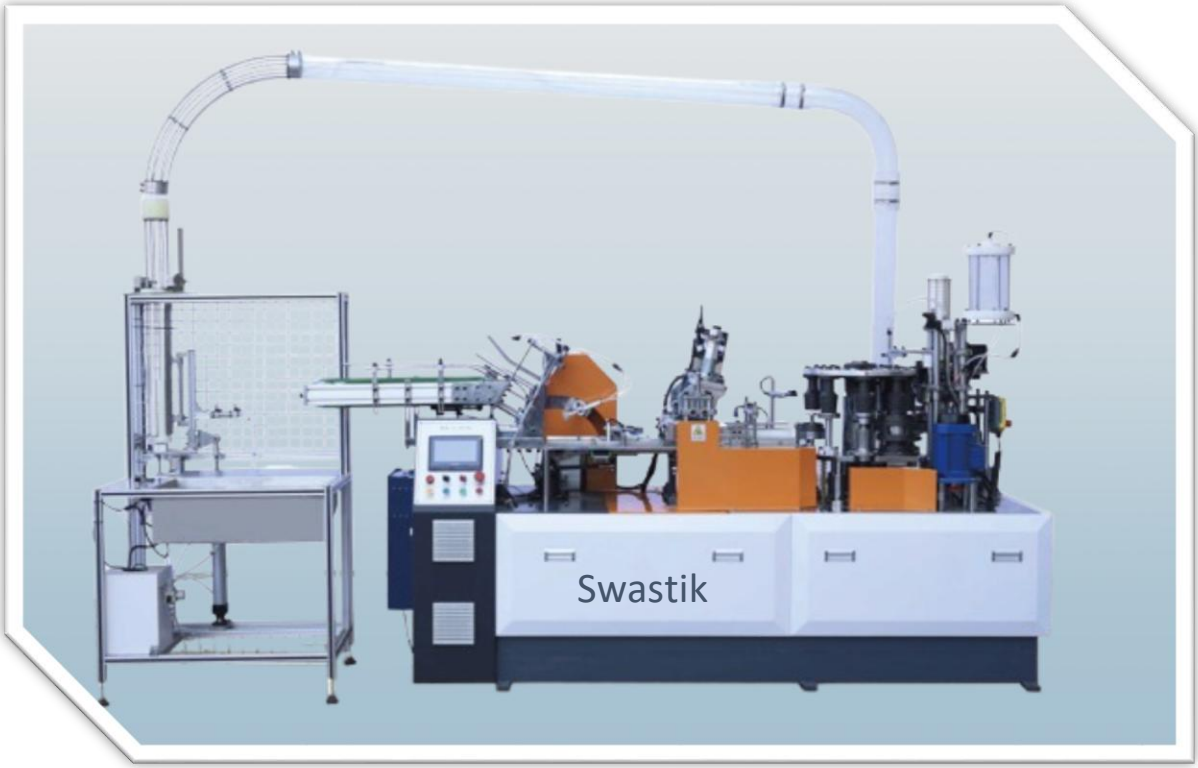

Our team is the heart and soul of everything we do, driving innovation, excellence, and a relentless commitment to quality. Comprised of highly skilled professionals with diverse expertise across engineering, design, manufacturing, and customer support, our team works collaboratively to bring the best solutions to the paper cup production industry.

SPM-DWR 100

Double Wall Ripple

DESCRIPTION:

The **High-Speed Ripple Double Wall Paper Cup Machine** is a state-of-the-art, fully automatic system designed for the efficient production of double-layer insulated paper cups. Engineered for high performance, it can produce up to 100 cups per minute, making it ideal for large-scale manufacturing. This machine seamlessly forms both the inner cup and the outer ripple or double wall sleeve, offering excellent insulation, durability, and a premium look—**perfect for hot beverages**. Equipped with ultrasonic sealing, servo-driven controls, and automatic sleeve pasting, it ensures precise operation, reduced waste, and consistent quality. Compatible with PE-coated, PLA, and printed paper, this machine is the ideal choice for sustainable, high-volume paper cup production.

Invest today to boost productivity and meet growing demand with ease!
